

The Blue Sky

by Marco Teatro

It happens that human beings, at least once in their lives, stop from their activities to admire the immense blue sky, capable of capturing their thoughts, as a constant presence in their existence.

The blue sky is one of the most difficult elements to represent in painting.

It is the background to "all", the landscape, the key element, the constant theme to many artworks.

Artists have always tried to represent the sky, so familiar, so vast; and they succeeded with unexpected and extraordinary results.

This petite painting (acrylic on canvas, 50x50 cm) represents the sky, surrounded by buildings.

Neighboring architectures are not complex or eye-catching. They simply adorn the sky, which is the real theme of the work.

It represents the moment people turn their eyes to the sky, which is a constant presence in everyday life, surrounded by buildings.
